## SURFACE DISINFECTION AND CLEANING OF NON-INVASIVE MEDICAL DEVICES WITH MECHANICAL ACTION

Good material and skin compatibility
**with low ethanol content**

Wide range of applications
**on surfaces and medical devices**

Efficient disinfection and cleaning performance **with long useful life and broad spectrum of activity***

Suitable for use **in the food industry**

**Nonwoven made from renewable resources!**

HACCP | NSF | DERMATEST

* Bactericidal (EN 13727, EN 16615), levurocidal (EN 13624, EN 16615), tuberculocidal (EN 14348) (M. terrae), mycobactericidal (EN 14348) (M. avium und M. terrae) and limited virucidal (EN 14476)

## PRODUCT DESCRIPTION

## Varied tasks **require multifaceted product solutions**

**DESCOSEPT SENSITIVE WIPES**

**DESCOSEPT SENSITIVE WIPES**

**DESCOSEPT SENSITIVE WIPES XL**

**DESCOSEPT SENSITIVE WIPES** are wipes for surface disinfection and cleaning of non-invasive medical devices with mechanical action. The alcohol-based wipes offer gentle disinfection and cleaning of medical devices, medical equipment and all kind of surfaces in near patient areas.

**DESCOSEPT SENSITIVE WIPES** feature a patented folding technology with an optimal ratio of non-woven fleece material to impregnating solution. This ensures a quick and effective disinfection, while also being gentle on sensitive surfaces and materials. The products are suitable for use on medium-sized areas.

**DESCOSEPT SENSITIVE WIPES** in packs of 100 wipes are the sustainable solution made from 100% plastic-free non-woven fabric from renewable raw materials. The non-woven material improves absorbency and ensures more efficient cleaning performance. The biodegradability of our nonwoven fabrics is certified to the European standard EN 13432.

**Both DESCOSEPT SENSITIVE WIPES** (also with non-woven fabric made from renewable raw materials) and **DESCOSEPT SENSITIVE WIPES XL** are effective against bacteria, yeasts (including C. auris) and enveloped viruses. **DESCOSEPT SENSITIVE WIPES** products are also suitable for reprocessing disinfectant dispensers made of anodized aluminium.

## APPLICATIONS AND NOTES

### Range of application

Surface disinfection and cleaning of non-invasive medical devices with mechanical action.

Acc. to Biocidal Products Regulation (BPR): Rapid disinfection and cleaning of medical inventory and all types of surfaces, mainly in near patient areas. Suitable for use in the food sector.

### Further areas of application

In addition to the medical sector also suitable for the food sector and large canteen kitchens as well as for industry and public facilities.

### Application

For professional use only. Wipe surfaces with DESCOSEPT SENSITIVE WIPES until completely wet and keep wet for the entire contact time. Visible soiling must be removed before disinfection.

According to the EU Medical Device Regulation, users/patients are obligated to report any serious incident that has occurred in relation to the device to the manufacturer and the competent authority of the EU Member State in which the user/patient is established.

### Application notes

Shelf life after opening: 42 days.

### Composition

100 g solution contain: 45 g ethanol.

### Material compatibility

Wide range of applications on surfaces and medical devices. (see page 5 - 8).

### Precautionary and hazard statements

Flammable liquid and vapour. If medical advice is needed, have product container or label at hand. Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Do not breathe vapours. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Dispose of contents/container to an approved waste disposal plant.

**Use disinfectants safely.**
**Always read label and product information before use.**
