POWDER CONCENTRATE FOR SURFACE DISINFECTION

1 / 10

Reliable disinfection
even in the event of an epidemic

Full spectrum of activity
for all cases

Very good compatibility
with almost any material

Excellent compatibility
with other disinfecting agents

**Suitable for
final disinfection**

SURFACE / DISINFECTANT CONCENTRATES

ULTRASOL® ACTIVE

PROTECT

PRODUCT DESCRIPTION

2 / 10

ULTRASOL ACTIVE is a highly effective powder concentrate that offers an excellent spectrum of activity for disinfecting and cleaning all types of surfaces.

ULTRASOL ACTIVE is a practically dust-free powder that can be dosed very easily and reliably.

ULTRASOL ACTIVE is on the RKI AB list and is suitable both for surface wipe disinfection where there are increased efficacy requirements in routine use and for disinfection in the event of an epidemic. Due to the active ingredient pe-

racetic acid generated in the mildly alkaline application solution, the product offers a comprehensive spectrum of activity, excellent material compatibility and good cleaning performance. The efficacy of **ULTRASOL ACTIVE** is guaranteed even with high organic loads and dried blood loads can be removed effortlessly and safely.

ULTRASOL ACTIVE is fragrance-free and low-odor and is suitable for all areas where maximum efficacy, exceptional user safety and good cleaning performance are required.

APPLICATIONS AND NOTES

According to Biocidal Products Regulation (BPR)

Disinfection and cleaning of surfaces and inventory in medical, industrial and public sectors.

Acc. to EU Medical Devices Regulation

Disinfection and cleaning of non-invasive medical devices.

Application

Wipe surfaces with a moistened cloth, ensuring evenly distributed wetting with the solution.

Medical devices that come into contact with the human body during intended use must be thoroughly rinsed off with water after the contact time has elapsed.

Surface disinfection:

Wet the surface to be disinfected completely with a sufficient amount of the freshly prepared **ULTRASOL ACTIVE** working solution and spread it mechanically (scrub-wipe disinfection). In routine use, the disinfected surfaces can be used again immediately after drying. Use personal protective equipment (protective gloves). Rinse equipment with water after use.

According to the EU Medical Device Regulation, users/patients are obligated to report any serious incident that has occurred in relation to the device to the manufacturer and the competent authority of the EU Member State in which the user/patient is established.

ULTRASOL[®] ACTIVE

PROTECT

APPLICATIONS AND NOTES

3 / 10

Application notes

Prepare working solution and stir several times. The solution is ready to use after 15 minutes. When using the working solution, ensure that there is adequate ventilation.

ULTRASOL ACTIVE is to be used with a maximum standing time of 24 hours. This must also be observed in combination with wipe dispenser systems.

Composition

Active substance: > 750 ppm peracetic acid generated from tetraacetylene-diamine (250 g/kg) and sodium percarbonate (450 g/kg). The active substance is released when the product is dissolved in water (in-situ, 10 g/l for a 1 % solution).

Material compatibility

Wide range of applications on surfaces and medical devices (see page 6 - 9)

Precautionary and hazard statements

May intensify fire; oxidiser. Causes serious eye damage. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take any precaution to avoid mixing with combustibles. Wear protective gloves/protective clothing/eye protection/face protection. IF ON SKIN: Wash with plenty of water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. Dispose of contents/container to approved disposal company or local collection.

For professional use only by personnel with corresponding specialist knowledge according to national directives.

Read label before use.
